Components

Station COMPACT F

station voltage single phase. Its compact architecture is perfectly adapted to Indoor use.

Line

For ease of maintenance and adjustment , the pylons are equipped with compression train sheaves, supports, or compression / supports.

Speed ... Special for beginners

The moderate speed of the line provides easy access for beginners, children and adults.

Fixed return station, arrival under the bullwheel

Station with fixed return pulley with the arrival under the bullwheel is ideal for beginners. This compact concept allows the maximization of the Indoor slopes area.

The towhanger

Fixed grip. Several lengths available for a perfect adaptability to the profile of the slope. Here, the slope allows the use of low-height pylons, to optimize the height of the ski hall.
