

**TC 8 Vin Pearl  
NHA TRANG, Vietnam**

**Description**

Multix 8 ... The Giant of the seas.

When a cable car crosses the China Sea to link a luxury island-hotel, the transport by gondolas rises to the occasion by providing an efficient and sustainable alternative route other than by boats. When technological innovation and know-how are the qualities essential to the success of this "first in the world", the Vin Pearl Trading & Tourism JSC chose the POMA Multix solution.

**Technical data :**

## Components

### Maritime Alternative

The cable car replaces the maritime shuttle service often rendered difficult during heavy seas and strong winds. Safe, available, reliable, the cable car Multix provides a comfortable welcome ideal for the passengers ... No more seasickness!

### Architectural integration

The hotel reception is installed inside the station. For an ideal integration with the architecture of the luxurious resort, it is clad in marble, according to the design code of the hotel.

### Pylons "typhoon proof?"

Designed to withstand the extreme weather conditions of the region, the towers have already supported several typhoons without any incident.

### 7 pylons ... Off shore

They Rise 70 m high above the water, in order to allow large ships under the line. Anchored at 40 m depth the pylons deploy a total height of over 120 meters!

## Design

The roof of the station provides an original cover, made of stretched canvas ... Efficient, modern and very fashion orientated!
