

# REFERENCEBOOK

2016 EDITION

**POMA**

The background of the image features a complex, abstract geometric pattern composed of numerous triangles of varying sizes and shades of blue. A faint, light blue grid is overlaid on this pattern, creating a sense of depth and structure.

**TOGETHER** TOWARDS  
A BRIGHTER FUTURE

Because humanity is the highest added value.  
Because your uniqueness and your differences  
are the source of our innovation.  
Because respecting the environment starts  
with an intimate understanding of territories,  
human cultures and their customs.  
Because the future of our planet relies on technologies  
leaving a small environmental footprint.  
POMA creates eco-efficient and eco-responsible  
transport solutions that provide smooth  
and durable mobility.  
To carry you where you need to go.

Parce que l'humain est la plus haute valeur ajoutée.  
Parce que vos particularités et vos différences  
sont la source de notre innovation.  
Parce que le respect de l'environnement commence  
par la compréhension intime des territoires,  
des cultures humaines et de leurs usages.  
Parce que l'avenir de notre planète appelle  
des technologies à faible empreinte environnementale,  
POMA crée des solutions de transport éco-performantes,  
éco-responsables et déploie une mobilité douce  
et durable.  
Pour vous transporter, là où vous vivez.

Connecting an island to a metropolis, travelling from one airport terminal to another on a cushion of air, bringing suburban districts to the city centre, flying over a river, replacing a road, a bus line, or a ferry.

In the heart of the urban jungle, POMA is turning cable transportation into the new public transportation solution.

Creating a means of transportation that matches your interests more and more, every day.

POMA innovates and installs customised eco-efficient solutions serving smooth, safe and durable mobility.

Relier une île à une métropole, se déplacer sur coussin d'air entre des terminaux d'aéroport, connecter des quartiers périphériques au centre des métropoles, survoler un fleuve, remplacer une route, une ligne de bus, un ferry... Au cœur des espaces urbains, POMA installe le transport par câble comme le nouveau mode de déplacement collectif.

Pour créer un mode de transport qui vous ressemble chaque jour davantage, POMA innove et déploie des solutions éco-performantes personnalisées, au service d'une mobilité éco-responsable, douce et durable.

A photograph of a young girl with long brown hair, tied back with a pink hairband, looking out over a city built on a hillside. She is wearing a white short-sleeved top and light blue shorts, leaning against a yellow metal railing. In the background, a modern cable car system with white and green cars is visible against a backdrop of dense green hills and numerous small buildings.

Whether it's to discover a nature park from an ecological funicular railway, create an indoor ski area, move through an amusement park, connect a city to a recreation area, or reach a resort island on a gondola lift, POMA tourism solutions bring friendliness, fun and splendour to your incredible projects. Able to provide complete architectural and environmental integration, our stations and carriers are entirely modular and configurable.

Technological options, specific layouts, aesthetic customisation: we create installations that are closer to your wishes, your cultures and your imagination. To make cable transportation enchanting and ecological.

Découvrir un parc naturel en funiculaire écologique, créer un espace skiable indoor, se déplacer au cœur d'un parc d'attractions, connecter une ville à une zone de loisirs, rejoindre une île-resort en télécabine... Conviviales, ludiques et spectaculaires, les solutions tourisme POMA se déclinent au gré de vos incroyables projets.

D'une capacité d'intégration environnementale et architecturale totale, nos gares et nos véhicules sont entièrement modulables, configurables.

Options technologiques, aménagements spécifiques, customisation esthétique, nous créons des appareils toujours plus proches de vos envies, de vos cultures, et de votre imagination. Pour faire du câble, un transport enchanteur, et écologique.

Imagine... High-performance, fast, silent and ecological transportation: installations with sober, environmentally integrated and harmonious lines, innovative panoramic carriers, accessible to all, with comfort and style. Imagine, and let yourself be guided: you are in the heart of the mountains, in the snow, the land of our roots and our passion.

Discover: our innovative, upgradeable solutions approved by the largest ski areas in the world.

As a pioneer in mountain cable transportation, POMA has provided all skiers and winter sports lovers with smooth and durable mobility for the past 80 years.

Imaginez... Des transports hautes performances, rapides, silencieux et écologiques ; des appareils aux lignes épurées, intégrés, en harmonie avec leur environnement naturel, des véhicules innovants, accessibles à tous, confortables et panoramiques.

Imaginez, et laissez vous transporter... Vous êtes au cœur des montagnes, dans la neige, sur les terres de nos racines, de nos passions.

Découvrez... Nos solutions neige innovantes, évolutives, plébiscitées par les plus grands domaines skiables du monde. Pionnier du transport par câble en montagne, POMA offre à tous les skieurs et amoureux des sports d'hiver, une mobilité douce et durable. Depuis 80 ans.

From nuclear research to massive civil engineering structures, from ore and goldmines to the most impressive hydroelectric dams in the world. POMA designs and develops high-tech cabins and funicular railways, high-performance goods aerial ropeways, flying belts and cable cranes for industrial and scientific applications. These reliable installations withstand even the harshest operating conditions.

De la recherche nucléaire aux grands ouvrages d'art, des mines d'or et de minéraux aux plus grands barrages hydro-électriques de la planète ; pour des applications scientifiques ou industrielles, POMA conçoit des funiculaires et des cabines high-tech, des téléphériques à matériaux, des flying belts et des blondins hautes performances, à la fiabilité éprouvée dans les conditions les plus extrêmes.
