

FOCUS ENERGY

ENHANCE THE ENERGY EFFICIENCY OF YOUR CABLE TRANSPORT SYSTEMS FOR MORE RESPONSIBLE ELECTRICITY CONSUMPTION

- Save up to **20% on energy costs**?
- **Monitor energy consumption** in real-time?
- Plan **renovations** combining **high performance** and **moderation**?
- Produce **renewable energy** within the resort?
- Develop a **carbon action plan** as part of energy efficiency awareness?

As a pioneer in cable transportation, POMA is embarking on LIFE R'way, an innovative approach with a selection of products with a low impact for the environment.

Starting today, let's work together to design increasingly sustainable mobility, to connect people and places in complete harmony with our environment.

POMA
A CONNECTION WE SHARE

Progressive, adaptable and increasingly sustainable products and services, always prioritising high performance and energy efficiency throughout the product life cycle, and ever-mindful of the health and safety of our employees.

Tried-and-tested innovations favouring **low environmental impact**, using fewer raw materials, less energy in the manufacturing process, short circuits, fewer consumables, **less energy**, maintaining a low environmental impact on the construction site and enabling these products to be recycled or reused at the end of their life span.

From low-energy-consumption solutions, that can even be installed remotely, to the transformation of products in terms of structural renovation, **POMA's turnkey solutions combine performance and energy frugality.**

LNE

ENDURANCE® roller battery
ENDURANCE® is the new innovative roller battery developed by POMA to ensure a low environmental impact and moresafety for the operation and maintenance teams.

- Energy savings: ● ● ●
- Investment: ● ● ●
- Compatible news products ✓ existing ✓

Liner EFFILINER®
Two French companies, POMA and Michelin, leaders in their field, have joined forces to offer a new exclusive liner EFFILINER® with a low environmental impact over its entire life cycle.

- Up to 10 % energy savings: ● ● ●
- Investment: ● ● ●

STATION

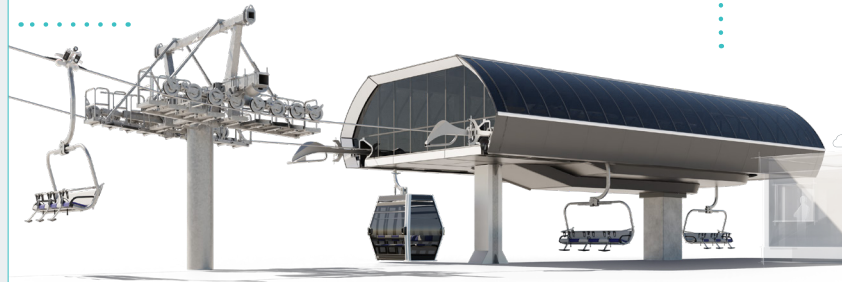

DirectDrive
Clean and quiet DirectDrive technology, which is in line with an eco-responsible approach: lower energy consumption, no fossil fuel consumption, reduced noise pollution, and increased safety of the operation and maintenance teams.

- Up to 8 % energy savings: ● ● ●
- Investment: ● ● ●
- Compatible news products ✓ existants ✓

Power Option for station covering
The Power option offers an additional source of renewable energy perfectly integrated into the station cover design, by installing semi-rigid photovoltaic modules instead of side glazing.

- Up to 5 % energy savings: ● ● ●
- Investment: ● ● ●
- Compatible news products ✓ existing ✓

STEERING

ECODRIVE
The ECODRIVE mode reduces wear and energy consumption of the ropeway by controlling the speed of the ropeway according to its rate of use, while maintaining user comfort.

- Up to 20 % energy savings: ● ● ●
- Investment: ● ● ●
- Compatible news products ✓ existing ✓

VEHICLES

Diamond EVO Cabin
From the standard version to the Premium one, this new generation of spacious and comfortable cabins offers smooth and durable mobility.
